- Heroku
- Adobe XD
- Trello
- Stripe
- Discord

PERSONAL ATTRIBUTES

- Passionate about people
- Always seeking growth
- Team Focussed
- Relentlessly optimistic

JUSTIN ELLIS

JUNIOR SOFTWARE DEVELOPER

ABOUT ME

At heart, I am an excitable sponge with a thirst for developing myself technically and creatively. It is my life mission to use this passion to help all those I can with all that I have.

With a background in live events and face to face tech support, I have a genuine love for working with people and high-pressure work environments. During COVID lockdown I re-kindled my interest in coding and became ever more enthusiastic about the future and the world of tech.

Looking to put all this energy into action I enrolled in Coder Academy Brisbane Fast Track 2020 and I am now looking forward to developing a career in tech.

PROJECTS

- Personal Online Portfolio Website
Tech used: HTML, SASS, CSS
Description: A scratch built website to show case portfolio items and links to get in contact.
Lessons learnt: Being my first coding project I learnt the massive value of reading documentation to solve problems and learn what is actually possible with the technology.
- The Curious Case of Dudley Manor
Tech Used: Ruby, JSON
Description: Text based mystery horror game.
Lessons learnt: The value of designing code that is flexible so that the project can adept quickly to a change in direction. For example hard coding as little as possible and maximising how much data is stored in external JSON and text files.
- Good 'n' Fast Loans
Tech used: Ruby on Rails
Description: A two way market place for loaning/borrowing house hold goods.
Lessons learnt: That setting an achievable scope is very important. Acquiring a board understanding of all technologies required before commencing coding will greatly assist in scheduling to this scope.

EDUCATION

- DIPLOMA OF IT (Coding), 2020-21
Coder Academy Brisbane
- BFA: TECHNICAL THEATRE & STAGE MANAGEMENT, 2017-19
National Institute of Dramatic Art (NIDA)
